Control panels feature compass bearing, wind speed and direction, speed, rpm, fuel level, winch settings, sail settings, radar and GPS are also included. Vehicle Simulator, first released on March 27, 2009 expands on Virtual Sailor by allowing for the simulation of automobiles and aircraft as well in addition to watercraft, while remaining backwards compatible with many of the add-ons created for Virtual Sailor.Critical receptionGameSpot said of the game "Virtual Sailor simulates the entire marine environment and makes a complete sailing experience, it's multiplayer capability for online sailing and racing creates an extremely immersive marine experience."
